

South Coast Amateur Radio Service

(SCARS) offering an on-line Amateur Radio License Class

South CARS - will be offering a free outreach course for persons interested in becoming a Ham. I have attached the flyer for the course. Connect to the *SCARS* conference server over ECHOLINK 96140 - ALLSTAR 27404 - IRLP 9614

Instead of my regular net starting on Sunday night August 12th, we are inviting interested persons to participate and learn.

It would be great if you could personally mentor a future ham on those Sunday nights. Personal contact and support goes a long way in creating new hams.

Course starts at 7 pm on Sunday August 12th and ends on September 2nd. Those that sign up early will receive course material.

Please distribute the flyer, post it in appropriate places, or sent it to those who might be interested.

The answer to the question, how does a person without an EchoLink connection participate in the SCARS Technician course, which begins this Sunday at 7 p.m. Eastern time - for a total of 8 sessions?

A special Skype Conference will be patched into the SCARS server for the class. Have all interested persons contact Gordon KY6V - ky6v@comcast.net - he will give all the details and set up the connection.

Check out the SCARS website, <http://www.scarsvoip.com/main/>, for all the details.

This course will be starting on Sunday, August 12th, and running through Tuesday, September 4th. It will be a four-week course with two classes per week Sunday and Tuesday evenings at 7 PM EDT. Classes will run about an hour per session.
